## TECHNOLOGY PROFICIENCY

- Languages : JavaScript
- Framework/Libraries : React Js (basics)
- Development stack : HTML5 / CSS, JQuery, Bootstrap, AJAX, JSON, REST API □ Tools : VS Code, GitHub, GIT, Postman

## PROJECTS

### 1. Country Information

A simple and useful website that displays a beautiful list of all the countries allowing the user to pick the country he wishes and provide details like country code, ISO code, name and flag.

- Integrated **3<sup>rd</sup> party API** to retrieve the list of countries and fetching the specific country details.
- Designed and developed the responsive page to show the list of countries using **jQuery Datatable**.
- Implemented the client side **pagination, sorting, filtering** on the country list dataset for quick user search results.
- Implanted **lazy loading** of the country flags (image) for better UX.
- Made use of **local storage web API** to avoid the frequent API calls.
